## **DETAILED ACTION**

### ***Specification/Claim objections***

1. The amended list of claims submitted on 09/30/2004 contains annotations regarding the numbering of the claims but corresponding annotations were not made in the numbering of the claim dependencies. Appropriate correction is required.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 34-39 and 46, drawn to isolated polypeptides.

Group II, claims 40-45, drawn to a nucleic acid encoding a peptide and a method of producing the peptide using it.

Group III, claims 47-49, drawn to a screening assay for modulators of OX40R-OX40L interactions.

Group IV, claims 50, drawn to a method of treating a disease.

Group V, claims 51-54, drawn to a method of detection of OX40R.

Group VI, claims 55, drawn to a method of antagonizing the activity of OX40L.

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the OX40L, known

Art Unit: 1647

also as ACT-4-L was known in the art (WO/95/21915) and the full length of the protein may be construed as a precursor, as in claim 1, h).

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are peptides as follows:

- a) (SEQ ID NO: 6) or a peptide sequence comprising between 5 and 10 amino acids, or an active mutant of them, or a fusion polypeptide or peptide comprising them and an amino acid sequence belonging to a protein sequence other than human OX40L (SEQ ID NO: 1), or an active fraction, precursor, salt, or derivative thereof;
- b) (SEQ NO ID: 8) or a peptide sequence comprising between 5 and 10 amino acids or an active mutant of them, or a fusion polypeptide or peptide comprising them and an amino acid sequence belonging to a protein sequence other than human OX40L (SEQ ID NO: 1), or an active fraction, precursor, salt, or derivative thereof;
- c) (SEQ ID NO: 13) or an active mutant of it, or a fusion polypeptide or peptide comprising them and an amino acid sequence belonging to a protein sequence other than human OX40L (SEQ ID NO: 1), or an active fraction, precursor, salt, or derivative thereof;
- d) a peptide or non-peptide mimetic;

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election. **In order to be fully responsive, the reply must elect one species from a) to d).**

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The claims are deemed to correspond to the species listed above in the following manner:

a) to d) – claims 34-55.

There are no generic claims.

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: they were known in the art at the time that the invention was made and they have different structure and different biochemical properties.

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1647

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elly-Gerald Stoica whose telephone number is (571) 272-9941. The examiner can normally be reached on 8:30-17:00.

Art Unit: 1647
